

## Wool 52c Per Pound

Four Months Old Lambs  
\$12.00

An industry that is making 100 per cent profit every year.  
One sheep that you can buy for \$7.00 in four months will raise you a lamb that is worth \$12.00 and that will give you a harvest of wool that is worth \$5.20.  
Get in the sheep business, and get in this fall. All you need to start is ten or fifteen head of sheep, an ad shed to house them during the winter months, and in February and March when they are giving birth to the young lambs.  
\$170.00 invested in sheep and \$60.00 invested in material for a Lomoco Sheep Shed where you can save every lamb that is born, will net you a profit of \$170.00 to \$200.00 in one year.  
For if you have a good, warm, tight shelter for the sheep when they are giving birth to lambs you can save every lamb, and many of the sheep will give birth to two lambs and you can save them all.  
You can't make a success in the sheep business unless you have a warm, dry, individual pen for the sheep when they are giving birth to lambs.

The Government is asking you to save fuel, feed and to build to protect your stock, feed and implements.

Let us show you the Lomoco Sheep Shed plans. They will help you save every lamb that is born.

Nearly every student has joined the association and we are looking forward to a promising year in athletics.

The Boys' Civic Club and Girl's Civic Club have been organized, and the following officers elected: Boys' Club: David Thompson, president; Vernon Johnson, vice president; J. C. Garrett, secretary, and Lester Maddox, treasurer.

The Girls' Club: Vivian Wolfe, president; Herschel Hupp, vice president; and Nadine Holloway, secretary and treasurer.

Military training is still in progress

and a marked improvement can be seen among the boys each time at drill. Suits have been ordered and it won't be long until all the boys will be in khaki uniforms.

Miss Johnson has resigned her position in B. H. S. Everybody regretted to see her leave. She had made many friends here last year and while she was here this year. But we are glad to have Miss Picklin back with us again.

#### Senior Sidelights.

If you want to see the base ball champions of B. H. S. just look at the Senior base ball team. They surely carried off the honors this time. They defeated the Freshmen 10 to 1 and the Sophomores 25 to 8. The Sophomores thought they had the base ball tournament; but when the

Seniors defeated them 25 to 8, they had another think coming. And that isn't all the Senior class is going to do this year. Watch us!

#### Sophomore Notes.

The Sophomore class is much grieved at the loss of Miss Johnson, our section room teacher. She has been a loyal, loving partner to each one of us.

The class has been busy the past week winning ball games and trying for the school championship.

The Sophomores are progressing well with their studies and hope to get ahead of the other classes.

#### Permits Not Necessary for Certain Farm Buildings.

A special telegram from Washington to the Retail Lumberman, published at Kansas City, says that the regional committee, co-operating with the National Retail Dealers Committee has secured a modification of the recent order which prohibited the construction of all kinds of new buildings until a permit had been first secured from the War Industries board. The modification permits dealers to sell up to \$1,000 worth of lumber for new construction without a permit. This for farm purposes only. Repairs and extensions for existing farm buildings, costing not in excess of \$500, can be erected without permits from any kind of material required for their construction, including lumber, cement, hardware and any other materials that may be used in its construction.

#### Auto Turns Turtle.

Three young people, Miss Opal Carr, Miss Hattie Vody and Claude Ellis were thrown from a car owned by Geo. Riek at the bridge north of the H. P. Robinson place at three o'clock this Saturday afternoon.

Miss Carr, who was driving, lost control of the motor car and it turned over with a crash. She received an ugly wound on the forehead and young Ellis several bruises about the head. Miss Vody escaped injury. It seems almost incredible that all were not fatally hurt.—Rich Hill Review.

#### School Six Days a Week.

Suggestions have been made to the Butler board of education to discontinue the Saturday holiday and hold school six days in the week, instead of five as is now the rule. By this means the school year could be finished more than one month earlier and many of the farmer boys who leave school before the end of the term could take advantage of the full term. Another argument used in favor of the six day week is that many of the High school boys would be available to work on farms in the spring, taking the places of men who have or who may hereafter be called into the service of their country. The opponents of the move argue that the student in order to do the best work should have at least one day each week away from his studies. That the health of the children, especially in the lower grades might be affected by too close an application to school work. This is a matter that has been studied for some time by the leading educators of the country, several of whom have written articles for the press either for or against the move, but up to date no action has been taken by any school so far as known.
